

PRODUCT DATA SHEET

100% PURE

AGMATINE SULFATE

Pre-Training Catalyst†

AGmass™
Agmatine Sulfate

Size: Net Wt. 50 g (1.76 oz.) | Serving Size: One (1) Scoop (500 mg) | Servings Per Container: 100

Max Muscle Agmatine Sulfate contains Agmatine Sulfate (as AGmass™) from Compound Solutions, Inc. and is a highly pure and natural source of agmatine manufactured by modern fermentation methods. Agmatine Sulfate is one of the newest and most exciting dietary supplements with many physiological benefits including as a pre-workout agent to support overall sports performance.†

Agmatine Sulfate (as AGmass™) is a biogenic amine and is the premier form of agmatine sulfate on the market having been HPLC tested to verify purity and potency. **Max Muscle Agmatine Sulfate** is not derived from 1,4 Diaminobutane so it does not contain the main impurity 1,4 Diguandinobutane found in other generic forms of Agmatine on the market.

Agmatine is part of a group of compounds called polyamines and is derived from the amino acid L-arginine through decarboxylation (the removal of the carboxylic acid group). Agmatine has diverse biochemical and physiological functions in the body including nitric oxide (NO) synthesis, cardiovascular, neuromodulatory and neurotransmitter functions (nootropic). Nootropics are ingredients that improve aspects of mental energy, focus, concentration and motivation. **Max Muscle Agmatine Sulfate** should be used in combination with regular exercise program.†

KEY FEATURES

- Contains Pure and High Quality Agmatine Sulfate (as AGmass™) from Compound Solutions, Inc.
- Proven Bioactive Ingredient to Increase Nitric Oxide for Maximum Blood Flow and Muscle Fullness†
- Promotes Nutrient Uptake to Muscles†
- Supports Nootropic Benefits†

KEY MESSAGES

- Agmatine Sulfate (as AGmass™) from Compound Solutions, Inc. is a highly pure and natural source of agmatine manufactured by modern fermentation methods.
- Agmatine Sulfate is one of the newest and most exciting dietary supplements with many physiological benefits including as a pre-workout agent to support overall sports performance.†
- Agmatine Sulfate is a biogenic amine and is the premier form of agmatine sulfate on the market having been HPLC tested to verify purity and potency.
- Agmatine is part of a group of compounds called polyamines and is derived from the amino acid L-arginine through decarboxylation (the removal of the carboxylic acid group).
- Not derived from 1,4 Diaminobutane so it does not contain the main impurity 1,4 Diguandinobutane found in other generic forms of Agmatine on the market.
- Agmatine has diverse biochemical and physiological functions in the body including nitric oxide (NO) synthesis, cardiovascular, neuromodulatory and neurotransmitter functions (nootropic).
- Primarily indicated as an effective pre-workout dietary ingredient used in combination with regular exercise program.
